PROFILE

I'm Saqlain Mushtaq, a senior backend developer with over 4 years of experience in designing scalable microservices, database-driven APIs, and automation solutions. I lead a team of engineers focused on creating high-performance systems for healthcare and SaaS domains. I work extensively with .NET, SQL Server, Azure, and modern CI/CD pipelines.

EXPERIENCE

DOT NET BACKEND DEVELOPER
Trucare Billing | Rawalpindi | Jun 2023 – Present

- Design & Development: Designed, Developed, optimized, and managed web APIs and databases, proficient in efficient query writing.
- Team Management: Lead and mentor a team of backend developers, code review, providing guidance and cross-functional collaboration with front-end developers, QA engineers and project managers for architectural-guidelines.
- Architectural Design & Deployment: Lead the design of backend architectures, making decisions on technology stack, scalability, and system reliability. Experienced in Azure and AWS for app deployment
- Performance Optimization: Identify and address performance bottlenecks, database optimization, system enhancements.
- Security: Ensure the implementation of security measures and best practices for backend systems, data protection, and compliance.
- Continuous Improvement: Stay informed about industry trends, emerging technologies, and best practices, promoting a culture of continuous learning within the team.

DOT NET BACKEND DEVELOPER
BellMedex | Rawalpindi | Dec 2021 – Jun 2023

- Database: Designed, optimized, and managed databases, proficient in efficient query writing.
- Web Services: Developed web services and APIs for seamless data exchange. Architecture: Applied MVC, Three-Tier, and SOLID principles for clean, maintainable code.

- Integration: Successfully integrated third-party services and APIs.
- Cloud: Experienced in Azure and AWS for app deployment and management.
- Troubleshooting: Strong problem-solving skills for quick issue resolution.
- Security: Implemented web app and API security, including OWASP Top Ten.
- Collaboration: Effective teamwork with front-end devs, QA, and cross-functional teams. Learning: Committed to staying updated with the latest .NET technologies and best practices.

INTERN - DOT NET DEVELOPER

BellMedex | Rawalpindi | Sep 2021 - Dec 2021
- Real Projects: During my internship, I worked on real projects, applying what I learned to create production-ready code.
- Mentorship: I collaborated with senior developers, learning best practices, coding standards, and problem-solving techniques.
- Full Lifecycle: I gained exposure to the entire software development lifecycle, from requirements to deployment and maintenance.
- Code Review: I actively participated in code reviews, improving my coding skills and understanding code quality.
- Problem-Solving: I honed my troubleshooting skills, vital for resolving technical challenges.
